GLF Partners With SEMTRON Co. Ltd. for Sales and Distribution in Korea

Santa Clara, CA. — October 12, 2016 — [GLF Integrated Power, Inc.](#), an emerging leader in ultra-efficient smart load switch technology, and SEMTRON Co. Ltd., a fast growing distributor in Korea, today announce a joint distribution agreement and partnership for marketing, sale, and support of I_QSmart™ load switches for industrial, automotive, and mobile markets in Asia. Effective immediately, SEMTRON Co. Ltd. will expand its product offering with inclusion of ultra-efficient I_QSmart™ load switch devices from GLF Integrated Power.

GLF offers smart power switch devices that lead the industry in critical efficiency specifications. The new GLF I_QSmart™ load switch devices, which offer best-in-class R_{ON}, I_Q and off-state leakage specifications, help designers of wearables, SSD modules, mobile devices, mobile medical devices and IoT products achieve improved product lifetimes and more efficient device operation.

“We picked SEMTRON as a distributor in Korea because of its ability to reach major customer accounts, and because of its efficiency in execution and sales.

Combining our market leading smart load switch products with their customer access should help catalyze rapid sales growth in Korea, and we look forward to rapidly growing our businesses together”, said

Eileen Sun, CEO at GLF Integrated Power. “By adding GLF to its line card, SEMTRON expands its offering to include a new generation of environmentally friendly, ultra-efficiency smart load switch and power switch devices.”

“GLF I_QSmart™ products have opened new doors in the customer space for SEMTRON. End customers have been very eager for efficient solutions for extending battery life in the wearable space. With current I_QSmart™ load switch products, and future products planned by GLF, SEMTRON is ready to work with all customers in the wearable world,” said Woo Jong Shim, managing director of SEMTRON Co., Ltd.

About GLF Integrated Power

GLF Integrated Power, Inc. is a Silicon Valley, California, fabless semiconductor company. Founded in 2013, our goal is to help your wearables, mobile/portable devices, IOT products and SSD devices live longer and more efficient lives. We design breakthrough, ultra-efficient, ultra-small, silicon power control and protection ICs. We launched our first I_QSmart™, ultra-efficient load switch device to lead customers in 2015 and globally in 2016, and achieved immediate design wins at major wearable, SSD, and portable device manufacturers.
